

WE WANT TO GIVE BACK

STATEMENT OF VALUES AND
GUIDING PRINCIPLES

WHAT WE DO

INNOVATING THE SMARTEST WAY FORWARD

Sustainable Future Group is an Australian owned organisation focused on reducing business operational costs with economically and environmentally sustainable solutions. We provide sustainable advisory services, technology products and financial expertise. Sustainable Future Group is motivated by challenging business-as-usual with integrated sustainable solutions.

For residential projects, we not only want to benefit the building but the wider community. We believe in helping in more than just one way and gaining the most out of each and every project.

**SUSTAINABLE FUTURE GROUP PROVIDE ADVISORY SERVICES,
TECHNOLOGY PRODUCTS AND FINANCIAL EXPERTISE**

ADVICE. TECHNOLOGY. FINANCE.

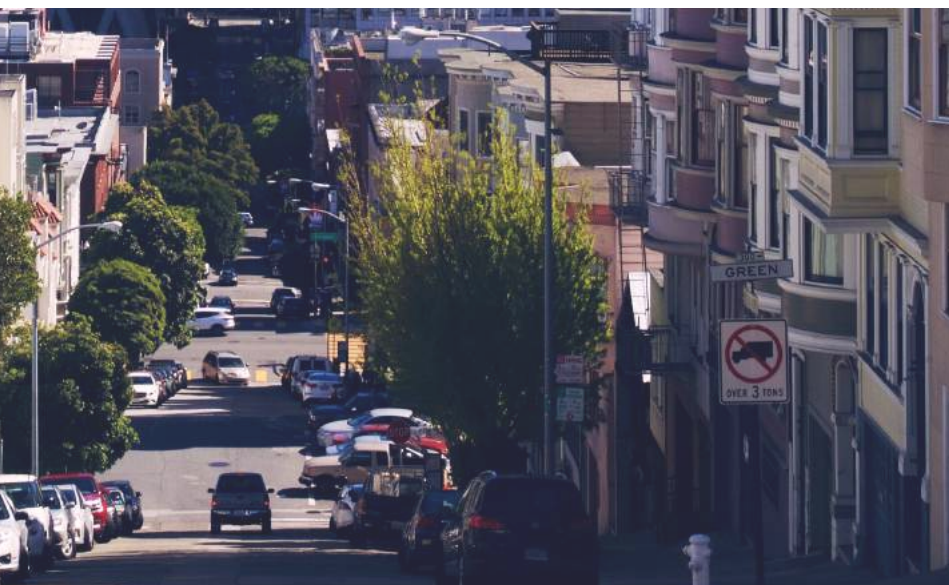

WHY WE DO IT

MISSION STATEMENT

"PROVIDE CLIENTS WITH THE
BEST SUSTAINABLE PRODUCTS
AND ALTERNATIVE ENERGY
SOLUTIONS TAILORED TO THEIR
BUSINESS TODAY AND INTO THE
FUTURE."

ADVICE. TECHNOLOGY. FINANCE.

WHO WE SUPPORT

We donate 2% of our profit to:

WHY WE SUPPORT THEM

Sustainable Future Group supports a range of charities and communities. Each of these charities have a close connection personally within the company. 1 Million Women are strongly focused on empowering women and girls to fight climate change, align with our sustainability goals.

The Cerebral Palsy Alliance looks after an important cause close to the director's heart. We want to achieve wider exposure and ensure that we are helping them in any way we can.

GOING ABOVE AND BEYOND

At Sustainable Future Group, we want to go above and beyond what others are doing. We are aiming to change communities, one project at a time. Through our residential projects, we aim to not only enhance the sustainability of the building itself but encourage the community in doing the same. Fostering community programs such as communal gardens, local procurement and work experience activities not only takes us a step closer to a sustainable future but gets the community together in taking pride collectively.

WE WANT TO GIVE BACK

LISTEN

We want to listen to all of the ideas you have to inspire the whole community and to get them involved in the process

IDENTIFY

This will help us identify projects that both encourage a sustainable future and benefit your community

GIVE

We want to give as much as we can to the community. These projects will meet the needs of the people along with the need for a sustainable future

WHERE WE WANT TO GO

CHANGING COMMUNITIES

Sustainable Future Group aim to change whole communities with all of their residential projects. Not only do we want to better the building but ensure we have enabled the wider community to all take part in making a change for the better.

AN EXCITING IDEA...

Sustainable Future Group proposes to install and help fund community gardens as a form of getting the local community involved with our projects and overall aim for the future.

This idea will not only bring the community together, but provide guidance and resources in achieving and increasing the need for sustainable designs and initiatives. These gardens will enhance community spirit and provide a need for continual support and nurture. This exciting idea can help residents and locals grow their own fruit and vegetables along with the ability to meet new people and create local connections.

Community gardens are just the beginning of the range of projects we aim to achieve through our residential projects. We want to achieve a sustainable future through involving local communities in each of our projects, and this is where we need your help.

We want to hear your ideas to provide us guidance for the future and meet the goals of both your community and our values.

HELP US REACH OUR SHARED GOALS
